1) Installation on Windows 7/8/10:

- 1) Go to: <https://www.drumlinsecurity.com/javelindownloads.html>
- 2) Click on „Javelin 3 PDF reader“ to start the download

Operating System	Download Links	Release version	Notes
MS Windows - Current Release			
Windows (7),8,10	Javelin3Pro PDF reader	3.0.0.49	Professional edition - registration required - recommended for Corporate use where users are connected to secure corporate networks with proxy servers and firewalls. If you have Windows 7 installed and Javelin3 will not run, you will need to use Javelin v2 instead. See lower down on this page
Windows (7),8,10	Javelin3 PDF reader	3.0.0.49	Standard edition - no registration required but some advanced features not available in this edition. If you have Windows 7 installed and Javelin3 will not run, you will need to use Javelin v2 instead. See lower down on this page

- 3) Install the programm by clicking on the file „jw3setup.exe“ that you just downloaded and follow the instructions
- 4) As soon as the program has been installed, you should be able to open „The Assessment Book“ .drmz file

- 5) As soon as you open the drmz file for the first time, you are prompted to insert the code we have provided you in the confirmation email (working internet connection necessary):

The image is a screenshot of a dialog box titled "Authorize Document". It contains three input fields: "Code:" with a text box and a "Paste" button to its right; "Document:" with a text box containing the path "C:\Users\Kai\Desktop\Physiotutors_The Assessment Book.drmz"; and "Document ID:" with a text box containing the number "37978". At the bottom right of the dialog box, there are two buttons: "OK" and "Cancel". The "OK" button is highlighted with a blue border.

- 6) Insert the code and confirm by clicking on „Ok“. Now you should be able to view the book. Enjoy!

2) Installation on Apple Mac OSX:

4) Frequently Asked Questions FAQ

Can I use the book on an Phone or Tablet (iOS & Android)?

Yes you can. [Click here for a tutorial \(shown for iPhone\) which should work the same for Android](#)

Javelin doesn't open on my Mac/Macbook!

Javelin is probably open but it launches without creating a window. Please refer to the installation video for Mac here: [Installation on Mac OSX](#)

How often can I activate the book?

You can activate the book on 2 devices of your choice

What happens when I get a new computer?

Please contact us at shop@physiotutors.com and we can assist you further

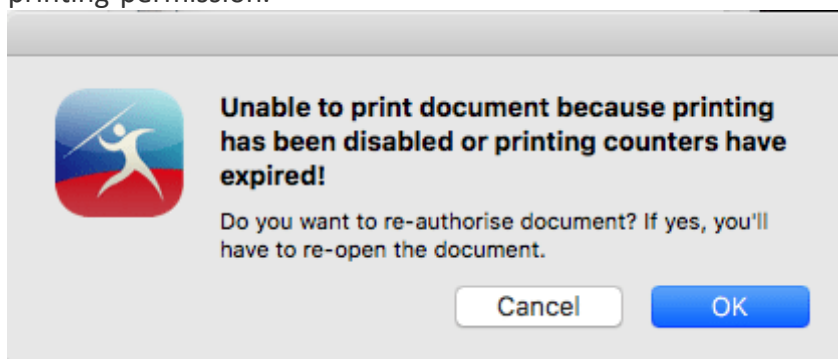

I lost my activation code/deleted the order confirmation email

Please contact us at shop@physiotutors.com . We can look up what your activation code was

Can I print the book?

No, printing is disabled for the book. Also, you will lose all functionality that the digital copy offers.

CAUTION: When trying to print, DO NOT CLICK "OK" on the pop-up window as you will have to re-activate your document. Javelin thinks you will re-activate the document with printing-permission.

It says *authorization code already used*

This usually means that you have activated the maximum amount of devices (2) with your code

I can't open the book because it says *webclipper active*

The configuration of our book does not allow screencapturing and any such active tools will prevent the .drmz file to be opened. Make sure no such tools are running while you are using the book. Check your Taskmanager or Process monitor and AutoStart if any such tools are active. Evernote and Microsoft OneNote can also cause the same problems

Will I get free updates?

Yes you will get an email once we publish an updated version of the book free of charge
